Report

Environmental Protection Day On November 25th 2021 Department of Zoology celebrated environmental protection day. The main purpose of the seminar was to spread awareness about the need to protect the environment and the ways to do it.

An eminent professor Nataraj, Dept of Microbiology, govt. Science College, Chitradurga speak on the ways to protect the environment he spoke about global awareness to take positive environmental action to protect nature and the planet earth

It is a day that seminar everyone on the planet to get involved in environmental friendly activities. Nagaraja Sir spoke about the theme of this year Ecosystem restoration reduce the waste, reuse the waste and recycle the waste etc.

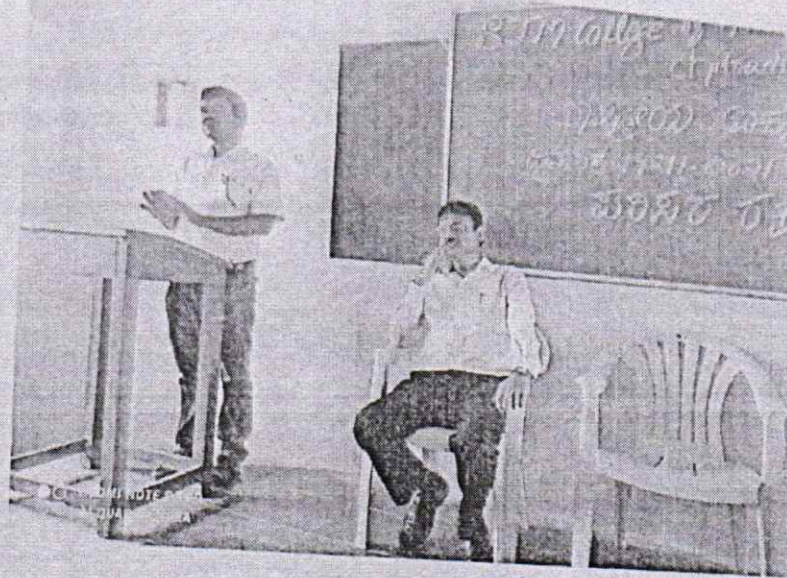

He highlighted many environmental issues which is going against nature. He explained many issues like global warming radioactive pollution, water, air and sound pollution

Lets nurture the nature so that we can have better future

REPORT ON SCIENCE DAY HELD ON 28-02-2022

National science day is celebrated in India on 28th February each year to mark the discovery of the Raman effect by Indian Physicist. Sir C.V Raman on 28th February 1928. In 1986 the national council for science and technology communication (NCSTC) asked the government of India to designate February 28 as National Science day. The event is now celebrated all over India.

The programme was started on 28th February at 10.00 am in Jayadeva hall. We started the celebration after the prayer song by Kavya. Our principal sir gave a speech on science day, this included why we celebrate science day and its importance. Vice principal and chief guest gave a wonder talk on science day.

Prof. Manjunath Swamy, Department of chemistry introduced the resource person of the programme Dr. Nagappa. They shared their knowledge on air pollution control and its effect on environment. The objective of this lecture was to consider current scientific knowledge about carcinogenic substances in air in relation to epidemiological data, and he mentioned some of the precautions that we must adopt in air pollution as much as possible. All the students co-operated & responded to the resource person.

He said about the air pollution, we breathe in use to be pure and fresh. But, due to increasing Automatization and concentration of poisonous gases in the environment the air is getting more and more toxic day by day. As well as these gases are the cause of many respiratory and other respiration related diseases. Moreover, the rapidly increasing human activities like the burning of fossil fuels, deforestation is the major cause of air pollution.

The fossil fuel, firewood, and other things that we burn produce oxides of carbons which got released into the atmosphere. Earlier there happens to be a large number of trees which can easily filter the air we breathe in. But with the increase in demand for land, the people started cutting down of trees which caused deforestation. That ultimately reduced the filtering capacity of the tree. Moreover, during the last few decades, the numbers of fossil fuel burning vehicle increased rapidly which increased the number of Pollutants in the air. which is more harmful for human health.

Finally the science day went more knowledge and at end of the programme prof Nagaraj B Department of Chemistry thanked all the chief guest and respected resource person for sharing their knowledge to us and the programme was ended by felicitating the respected resource person Dr. Nagappa.
